Taisox 7350M

1. Product description

7350M are an ethylene/vinylene acetate copolymer. The trade name is Taisox. This product manufactured by the high-pressure process. By incorporating vinyl acetate (VA) into the ethylene chain produce co-polymerization to EVA.

7350M are a general-purpose for X-linked foam shoes, mid-sole, gaskets. It provides good chemical resistance, excellent elasticity, and high flexible properties.
